

Enterprise Capability

AI, blockchain, Redis and software delivery for governments, PSUs and enterprises.

What we do

- Enterprise software and citizen platforms
- AI/ML engineering and document intelligence
- Blockchain provenance and verification
- Redis performance and resilience
- Cloud, integration, DevSecOps and operations

Delivery model

- Discover and baseline
- Design architecture and controls
- Prototype and PoC
- Pilot with real users
- Scale with training and SLA
- Operate and continuously improve
